Experience

OPSKUBE | Full stack junior developer

September 2021 - March 2022

- I worked on aadesh travel project. A company from gujarat based on airline ticket booking platform.(angularjs, node).
- I worked on catapulto.ru .Its a russian based courier service company.(ReactJs)
- I also worked on a accounting based software systec..which is currently not in production But its a really Big accounting software

Projects

Real Estateproperty react js project | Real state property in Dubai [\(link\)](#)

- I created this app for using the rapid api.
- This app has a search filter functionality wherebwe are using the different end points of API
- I use the chakra UI in this app for css and UI

React js App with the functionality of infinite scrolling without using any 3rd party package | Infinite scrolling with the API of unsplash [\(link\)](#)

- Use 3rd party Unsplash API
- In this app we can do infinite Scrolling just like other Social Media Platform
- I didn't use any 3rd party package for infinite Scrolling, I just used react hook and few JS method and window scrollTo calculation

React redux slack-clone with fully authentication | Slack [\(link\)](#)

- This is a reactjs Project with fully authentication and authorization
- I used firebase as a backend in this project
- I also used Realtime chat database so we can chat here just like whatsapp and facebook

MI store project on React js | MI store-india [\(link\)](#)

- This is a clone of MI-india website Project.
- I used same UI of MI-india website project.
- It's fully responsive.I used bootstrap in this project

React js and redux app with using firebase as a backend | disney App [\(link\)](#)

- Its a Disney World website copy.
- I used firebase as a backend.
- All the data comes from backend
- I also used redux for authentication management.
